
Welcome to AutoCAD 2009 Online

Dear Student,

Welcome to distance education at Cuesta College! My name is Jeff Jones, and I will be your instructor in the upcoming online version of AutoCAD 2009 (ENGR125). This letter is to inform you of some important details prior to the commencement of the online class. Please read this page carefully!!

Book Requirements

You will need to purchase your textbook for the class. The textbook "AutoCAD 2009, Level 1, RRTC" is in the bookstore and is a required text. The cost of the book is about \$100

Online Lectures

There are 2 ways in which you can learn the material. Either read the textbook, and/or you can view the video lectures online at www.YourOtherTeacher.com. Inside your book you will find a coupon that will get you free access to the site. You can view a free sample online lecture at YourOtherTeacher.com (click on "FREE" at the site to see if this format is right for you).

Software Requirements

You will need access to AutoCAD2009. If you don't have access at work or home you can also use the lab facilities at Cuesta College in building 3400 (2nd floor, SLO campus). You can also purchase the software in our bookstore, online, or download a free trial version. Please read the FAQs on my website for more detail.

Orientation/ Frequently Asked Questions (FAQs)

The orientation is online and can be found on my Cuesta website. The orientation consists of the student reading the FAQs and browsing the links on the site. Email me if you need further information. <http://academic.cuesta.edu/jjones/Engr26/index.htm>

Meetings

The only required meetings will be on the 2 exam days (**one Tuesday and one Thursday at 10:30 am**). Students who can't make it at 10:30 am can take the exams with the non-online class at 7:30 am on the same days. Please make sure your class schedule allows you to come at either 7:30 or 10:30. Exams may last up to 2 hours. All exams will be in room 3406 (SLO campus). There are no provisions for anyone who misses any of these exams. Let me know if you are having problems with anything related to the course.

See syllabus and web site for more information
