Public Lecture Series on Global Warming hosted by Cuesta College in San Luis Obispo and North County

Cuesta College Community Programs is hosting a free public lecture series on “The Science and Data of Global Warming,” at both the San Luis Obispo and North County Campuses throughout October.

The public lectures will feature Dr. Ray Weymann, an Atascadero resident and retired astrophysicist with 40 years of experience teaching and researching at major universities and observatories. His research has included varied topics from the history of the early expanding universe to the atmosphere of stars. His research includes calculations and observations made with some of the world’s most powerful telescopes, including the Hubble Space Telescope.

The first three lectures in the series will focus on the complexity and major factors influencing the climate and global warming. The final evening of the lecture series will be a panel discussion regarding responses to global warming and will be facilitated by the League of Women Voters.

The lecture series will begin on the San Luis Obispo campus in the Science Forum Room 2402 on Tuesday, October 9, 16, 23 and 30 at 7:30 p.m. The lectures series on the North County Campus will be held on Thursday, October 11, 18, 25 and November 1 at 7 p.m. in Batdorf Hall Room N2401.
